Capability Statement

Project Management and Project Engineering - Onsite and Offsite Support

DJH Project Services provides practical project delivery support through study, design, procurement, construction, commissioning and close-out. The business is led by Daniel Houlihan, a project leader with experience delivering multidiscipline industrial and construction projects in brownfield and greenfield environments.

Focused on safe delivery, strong project controls, contractor coordination and outcome-driven execution.

Services	Typical Deliverables
• Project management and project engineering from prefeasibility to close-out	• Execution plans, project requirements and management plan development.
• Project support for brownfield and greenfield works	• Schedules, cost trackers and reporting
• Shutdown and outage planning, readiness and execution support	• Construction readiness plans and interface coordination
• Procurement, tendering, scope of work, contract packaging and evaluation	• Safety, risk and quality management support. Risk assessment facilitation.
• Site coordination, contractor management and stakeholder reporting	• Commissioning, completion and handover support

Why DJH Project Services

- Led by a senior project professional with 15+ years across engineering, construction and operational environments. Focus on safe and high-quality delivery.
- Experience spanning owner's teams, principal representative roles and direct site delivery leadership.
- Strong multidiscipline exposure across mechanical, structural, piping, electrical and controls interfaces.
- Hands-on experience delivering brownfield works, shutdowns, outages and live operational interfaces.
- Flexible support models suitable for embedded onsite roles or offsite planning and project controls functions.

Systems Experience

- Microsoft Office and Microsoft Project
- Primavera P6
- PMO365 and CMMS
- Aconex and InEight
- AutoCAD, Navisworks and FEA tools

Selected Relevant Experience

Project	Value	Role	Relevant scope
Kooragang Shiploader Optimisation Program - PWCS	~$240M	Senior Project Manager	Led yearly major outage works from prefeasibility to execution and close-out, including design contracts, procurement, reporting, contractor management and delivery of structural, mechanical and electrical upgrades.
Major Projects Portfolio - PWCS	$0.5M-$4M	Project Manager	Managed multiple mechanical and structural projects including budgets, schedules, shutdown preparation, site risk management and engineering coordination.
Hunter Valley Operations Project - CHPP	~$1.1Bn program	Area Manager	Managed design-phase development for major CHPP infrastructure packages, including execution plans, tender documentation, project requirements, interfaces and geotechnical investigations.
Mount Owen Flotation Project - Glencore	~$30M	Construction Superintendent	Managed owner's team and contractors across civil, structural, mechanical, piping, electrical and controls works, including PSI coordination, change management and commissioning readiness.
United Wambo Water Management System	~$96M	Project Engineer / Construction Superintendent	Supported feasibility, tendering and later construction delivery for dams, levees, pumping, pipework and associated infrastructure in an active mining environment.
Integra Shaft #3 Project	~$16M	Project Engineer	Managed tenders, scope development and overhaul works associated with major ventilation fan relocation, switchgear, transformers and associated infrastructure.
Ulan West Project	~$1Bn	Project Engineer	Managed design review, principal-supplied equipment and construction quality for conveyor and sizing station upgrades in a brownfield operating environment.
Liddell Seam Project	~$147M	Project Engineer	Delivered tendering, contract coordination, equipment introduction, conveyor installation planning and commissioning support for underground mining infrastructure.

Engagement Model

- Offsite or onsite project procurement, engineering, management, safety and/or quality support
- Offsite planning, procurement, tender package development and project controls support.
- Owners team or client-side representation through design and construction.
- Flexible short-term, package, outage-based or project lifecycle support.
